From Nagpur 60 Kms by Road/ By Train
From Gondia 90 Kms by Road/ By Train
From Raipur 300 Kms by Road/ By Train

Bhandara is on National Highway No.6 & Hawda-Mumbai Railway Route

About Conference

The aim of the conference is to provide an opportunity to academicians, professionals and scholars to design, implement and evaluate constructivist teaching learning.

Constructivism is basically a theory based on observation and scientific study about how people learn. It is said, that people construct their own understanding and knowledge of world through experiencing things and reflecting on those experiences. When we encounter something new, we have to reconcile it with our previous ideas and experience, may be by changing what we believe or may be discarding the new information as irrelevant. In any case we are active creators of our own knowledge. To do this we must ask questions, explore and assess what we know.

Constructivist view of learning can point towards a number of different teaching practices. In the most general sense it usually means encouraging students to use active techniques (experiments, real world problem solving) to create more knowledge and then to reflect on and talk about what they are doing and how their understanding is changing. The teacher makes sure he/she understands the student`s pre existing conceptions and guides the activity to address them and then build on them.

Conference Objectives

1. To enable teacher educators to understand the concept need and importance of constructivism in education.
2. To encourage teacher educators to undertake research work in constructivism in school subject.
3. To bring awareness about constructistic approach among teacher educators, scholars and students

Main Theme

Constructivism in Education

Sub Themes

1. Curriculum for constructivistic learning
2. Organization of classroom for constructivistic learning
3. Constructivism in school subjects (Science/Maths/Language/Social Science etc)
